Subject index, Volume 22

All mineral names occuring in titles, subtitles and abstracts are indexed Chemical formulae are according to M. Fleischer, Glossary of Mineral Species, 1983 (in some cases simplified) or as given by the author. The numbers refer to the title page.

A

Annite, $KFe_3^{2+}AlSi_3O_{10}(OH)_2$, solid solutions with phlogopite, nuclear gamma ray resonance (NGR) of ^{57}Fe in, 282
Anorthite, $CaAl_2Si_2O_8$
  model for cell doubling phase transition of body centered 129
  ^{29}Si nuclear magnetic resonance and $P\bar{1}$-$I\bar{1}$ phase transition 268
Arsenopyrite, FeAsS, X-ray spectra (XANES) of 311

B

Barite, $BaSO_4$, SO_4^{3-} radical in 406
Bernalite, $Fe(OH)_3$, crystals chemistry of 11
Brucite, $Mg(OH)_2$
  ab initio study of 461
  high pressure X-ray diffraction on 277
  static compression and hydrogen disorder in 200

C

Calorimetry, of synthetic quartz and dislocations in 67
Celestine, $SrSO_4$, SO_4^{3-} radical in 406
Chabazite, $CaAl_2Si_4O_{12} \cdot 6\,H_2O$, water diffusion in 443
Chemical bonding
  electronic structure of disulfides of the pyrite- and marcasite-type disulfides and their isomorphs arsenopyrite and cobaltite 311
  electronic structure of molybdenite 123
  the ionic model in, extension to spatial charge distributions 186
  quantum mechanical ab initio study
    of C2/c enstatite 453
    of brucite, diaspore and theoretical hydrous wadsleyite 461
Clinoenstatite, $Mg_2Si_2O_6$, ab initio study of C2/c- 453
Clinopyroxene group, $(Mg,Fe)_2Si_2O_6$, model for cell doubling phase transition of 129
Cobaltite, CoAsS, X-ray spectra (XANES) of 311
Coesite, SiO_2, calculation of thermodynamic properties of 233
Compressibility
  of $(Mg,Fe)_2SiO_4$ olivines 99
  of muscovite 170
Cristobalite, SiO_2, β-phase, thermal expansion of 61
Crystal structure
  four connected nets in the topologies of BGB silica structures 504
  high temperature study of ortho-proto transition in enstatite 300
  of garnets, refinement of 159
  of sodium trisilicate formed at high pressure 383
  of the high pressure hydrous magnesium silicate phase F 295
  of the high pressure phases $CaFe_3Ti_4O_{12}$ and $CaFeTi_2O_6$ 251

D

Davyne, $(Na,Ca,K)_8Al_6Si_6O_{24}(Cl,SO_4,CO_3)_{2-3}$, thermal expansion of 367
Defects
  and infrared reflectance of maghemite 21
  energy associated with dislocations in synthetic quartz 67
  hydroxyl in forsterite 387
  in fine crystalline goethites, Néel temperature in relation to 524
  in orthoclase, by neutron irradiation 399
  in tephroite, and electrical conductivity 489
Diaspore, AlOOH, ab initio study of 461
Dielectric properties
  and phase transition in titanite 41
  infrared, of maghemite 21
Diffusion
  of Ca in diopside, at high temperatures, premelting and 437
  of water in zeolites 443
Diopside, $CaMgSi_2O_6$, Ca-diffusion at high temperatures and premelting of 437
Dioptase, $Cu_6^{2+}Si_6O_{18} \cdot 6\,H_2O$, vibrational analysis of six membered rings in 137

E

Electric conductivity
  and the polaron mechanism in iron-bearing trioctahedral phyllosilicates 468
  of tephroite, mechanism of 489
Electrochemical measurements, and mica break-down by oxidation 507
Electronic absorption spectra, of bernalite 11
Electron paramagnetic resonance (EPR),
  of Al–O^-–Al centers in kaolinite 351
  of SO_4^{3-} in barite and celestine 406
Element partitioning, between olivine and melt, at high pressure 411
Enstatite, $Mg_2Si_2O_6$
  ortho-proto phase transition of, studied by high temperature X-ray diffraction 300
  pVT-data for 393
Enstatite- and perovskite-type $MgSiO_3$, the Fe-site in, from XANES 318
Equation of state
  for brucite 277
  for $(Mg, Fe)_2SiO_4$ olivines 99
  for silicate perovskite, confidence limits of 375

F

Fayalite, Fe_2SiO_4, nuclear gamma ray resonance, of ^{57}Fe in powder and single crystals of 259
Feldspar group, Sr-feldspar, Al/Si-ordering in 343
Feroxyhyte, δ-FeOOH, magnetic properties of 333
Ferriolivine, formation of, during oxidation of $(Mg, Fe)_2SiO_4$ olivine 241
Forsterite, Mg_2SiO_4, OH^--defects in 387
Framework silicates, four-connected nets in BGB silica structures 505

G

Garnet group, local environment of calcium in 159
Goethite, FeOOH, defects in fine crystalline, and Néel temperature of 524

H

Heulandite, $(Na,Ca)_{2-3}Al_3(Al,Si)_2Si_{13}O_{36} \cdot 12\,H_2O$, water diffusion in 443
High Pressure
  amorphitization of olivine at, effect of Mg-Fe substitution on 99
  element partioning between olivine and melt at 411
  modelling of phase transitions at 145
  polymorphism of Ca_2SiO_4 at 419
  powder neutron diffraction at, on brucite 200
  Raman spectra of aluminous $MgSiO_3$-perovskite at 511
  structural study of muscovite at 170
  X-ray diffraction of olivines up to 70 GPa 99
Hydroxyl groups
  ab initio calculations on $(OH)_4$ defects in quartz 357
  defects in forsterite 387
  type and orientation of, in staurolite 108

I

Infrared absorption (IR) spectra
  and Al/Si ordering in Sr-feldspar 343
  and phase transition in titanite 41
  and phase transition in tridymite 50
  of OH-groups in staurolite single crystals 108
  polarized and OH-defects in forsterite 387
Infrared reflectance spectra, of maghemite 21
Interatomic potentials, derived by Hartree-Fock calculations, in calculation of thermodynamic properties of silica polymorphs 233

K

Kaolinite, $Al_2Si_2O_5(OH)_4$, dehydroxylation, kinetics of 207

Kinetics
of kaolinite dehydroxylation 207
of mullite formation from kaolinite dehydroxylation products 215
of oxidation of $(Mg,Fe)_2SiO_4$ olivines 241

L

Landau theory, order parameter and cell doubling phase transition in anorthite and clinopyroxene 129
Lattice dynamics
and disorder models in successive structure transitions in tridymite lattice strain, (induced in...) 223
induced in orthoclase by neutron irradiation 399

M

Maghemite, γ-Fe_2O_3
and Al-substitutions, hyperfine parameters of ^{57}Fe in 178
dielectric properties in the infrared 21
Magnetic properties
and spin structure in feroxyhyte 333
Néel temperature and defects in fine crystalline goethites 524
of bernalite 11
Marcasite, FeS_2, X-ray spectra (XANES) of 311
Melts, aluminosilicate, high temperature Raman spectra of 74
Mesolite, $Na_2Ca_2Al_6Si_9O_{30} \cdot 8\,H_2O$, water diffusion in 443
$Mg_{3.35}Si_{5.51}H_{7.26}O_{18}$, high pressure phase F, crystal structure of 295
Mica group
Al-Si configurational entropy from ^{29}Si NMR spectra 87
annite-phlogopite solid solutions, NGR of ^{57}Fe in 282
dynamic electrochemical monitoring of oxidative breakdown of iron-bearing members 507
the polaron mechanism in Fe-bearing trioctahedral members 468
Microsommite, $(Na,Ca,K)_{7-8}(Si,Al)_{12}O_{24}(Cl,SO_4,CO_3)_{2-3}$ 367
Modelling
of pressure induced phase transitions of mantle minerals by PEG approximation of Hartree-Fock calculations 145
of protonated silicate and aluminate species by G2-theory 481
of structures and properties of minerals, energy minimum criteria in 151
vibrational for λ-type transitions 1
Mössbauer spectroscopy, cf. Nuclear gamma-ray resonance (NGR)
Molybdenite, MoS_2, electronic structure of 2 H, from X-ray spectra (XANES) 123
Muscovite, $KAl_2AlSi_3O_{10}(OH)_2$
accuracy of predicted thermodynamic properties 428
high pressure response of the structure of 170
Mullite, $Al_6Si_2O_{13}$, formation from kaolinite dehydroxylation products, kinetics of 215

N

$Na_2Si_3O_7$, formed at high pressure, crystal structure of 383
Natrolite, $Na_2Al_2Si_3O_{10} \cdot 2\,H_2O$
accuracy of predicted thermodynamic properties 428
water diffusion in 443
Neutron diffraction, on brucite at high pressures 200
Nuclear gamma-ray resonance (NGR) of ^{57}Fe
in annite-phlogopite solid solutions 282
in bernalite, temperature dependent 11
in feroxyhite 333
identification of oxidation products of olivine by 241
in maghemite, temperature dependent 178
on powder and singe crystals of fayalite, at low temperatures 259
Nuclear magnetic resonance (NMR), of ^{29}Si at high temperatures and $P\bar{1}$-$I\bar{1}$ transition of anorthite 268

O

Optical absorption spectra, cf. electronic absorption spectra
Order/disorder
Al/Si in Sr-feldspar 343
of protons in brucite at high pressures 200
Orthoclase, $KAlSi_3O_8$, lattice strain in, caused by neutron irradiation 399
Olivine group
Ca_2SiO_4, high pressure polymorphism of 419
element partitioning between olivines and melt at high pressure 411
Fe-Mg substitution and amorphitization of olivines at high pressures 99
oxidation kinetics of olivines 241
tephroite, electric conductivity of 489
thermodynamic properties of olivines 323

P

Perovskites, ordered phases on the join $CaTiO_3$–$FeTiO_3$ at high pressures 251
Perovskite-type
aluminous $MgSiO_3$, Raman spectra of 511
$MgSiO_3$, iron site in, from XANES 318
silicates, confidence limits of equations of state for 375
Phase transition
cell doubling in clinopyroxene and anorthite, model for 129
λ-type, vibrational modelling of 1
ortho-proto in enstatite 300
$P\bar{1}$-$I\bar{1}$ of anorthite by ^{29}Si NMR 268
in tridymite 50
disorder and successive structure transitions 223
MX1, studied by ^{29}Si NMR 30
Phlogopite, $KMg_3AlSi_3O_{10}(OH)_2$, solid solutions with annite, ^{57}Fe NGR in 282
Polaron mechanism, of electric conductivity and electronic absorption in trioctahedral, iron-bearing micas 468
Pyrite, FeS_2, X-ray spectra (XANES) of 311
Pyroxene group
clinoenstatite, C2/c, ab initio study of 453
orthopyroxene, correction for crystal tilt in HRTEM images of 517

Q

Quantum mechanics
ab initio study of brucite, diaspore and theoretical hydrous wadsleyite 461
ab initio study of C2/c enstatite 453
PEG approximated Hartree-Fock calculations on high pressure phase transitions 145
Quartz, SiO_2
β phase transition, modelling of 1
calculation of thermodynamic properties of 233
hydrolytic weakening and the formation of molecular water from hydroxyl defects 357

R

Raman spectra
of aluminous $MgSiO_3$ perovskite at various temperatures and high pressures 511
of aluminosilicate melts at high temperatures 74
on single crystals of dioptase and vibrational analysis of six membered rings therein 137
and water tracer diffusion in zeolites 443
Ringwoodite, γ–$(Mg,Fe)_2SiO_4$ thermodynamic properties of 323

S

Scolecite, $CaAl_2Si_3O_{10} \cdot 3\,H_2O$, water diffusion in 443
Silicate and aluminate, protonated species, modelling by G2-theory 481
Silicon, six coordinate, in the high pressure phase $Na_2Si_3O_7$ 383
Staurolite, $(Fe^{2+},Mg,Zn)_2Al_9(Si,Al)_4O_{22}(OH)_2$, OH-vibrations in, from polarized IR-spectra 108
Stishovite, SiO_2, calculation of thermodynamic properties 233
Synthetic minerals
annite 282
biotite 282
brucite 200
cristobalite 61
diopside 437
feroxyhyte 333
fayalite 259
hydrous magnesium silicate phase F 295
maghemite 21, 178
perovskite-type phases 251, 318, 375, 511
phlogopite 282
quartz 67
Sr-feldspar 343
tephroite 489
tridymite 30, 50

T

Tephroite, Mn_2SiO_4, electrical conductivity of 489
Thermal expansion
of β-cristobalite 61
of davyne group minerals 367
Thermodynamic properties
Al–Si configurational entropy of micas from ^{29}Si NMR spectra 87

heat capacities and phase transition in titanite 41
of phases in the FeO–MgO–SiO_2 system 323
prediction of, influence of uncertainties in structure refinements on accuracy of 428
pVT-data for orthoenstatite 393
of silica polymorphs, calculated 233
Titanite, $CaTiSiO_5$, phase transition in 41
Transmission electron microscopy
and Al/Si ordering in Sr-feldspar 343
(HRTEM), corrections for crystal tilt in 517
(HRTEM), identification of ferriolivine formed by olivine oxidation 241
of bernalite 11
Tridymite, SiO_2
disorder and successive structural transitions in 223
MX1 polymorph, study of modulated structures and phase transitions by ^{29}Si NMR-spectroscopy 30
study of thermally induced phase transitions by IR-spectroscopy 50

V

Vibrational spectra, cf. Infrared absorption spectra, infrared reflectance spectra, Raman spectra

W

Wadsleyite, β-$(Mg,Fe)_2SiO_4$
ab initio study of hypothetical hydrous 461
thermodynamic properties of 323
Water, solubility in quartz 357

X

X-ray spectra (XANES)
Ca K-edge in garnets and the local environment of Ca therein 159
Fe K-edge of iron in $MgSiO_4$ enstatite and perovskite 318
of pyrite and marcasite type disulfides and their AsS-isomorphs 311
polarized, and electronic structure of molybdenite 123
Si K-edge of silicates 115
